

## Assignment Five

### ECE 4200

- The due date is 10/18/2020, 23.59.59 ET.
- This assignment is primarily for us to gather information about the class.

**Note.** Please answer to the best of your knowledge, and as truthfully as possible. Feedback will be helpful for us. We can get the data from canvas and from zoom, but this is much quicker. **You will get full points for answering the questions regardless of the answers.**

- Problem 1. (25 points).**
1. Until 10/8, how many lectures have you not seen? If you attended the lecture synchronously, or watched the video later, it is counted as being watched. Your answer should be a number between 0 and 11. **0, attended all of it**
  2. Until 10/8, how many discussions have you not seen? If you attended the discussion synchronously, or watched the video later, it is counted as being watched. Your answer should be a number between 0 and 5. **0, attended all of it**
  3. Is there anything we can do to increase your attendance in the lectures live? **Nope, I joined live**
  4. If you are not watching lectures, do you feel the notes are sufficient to solve the assignments? **N/A**
  5. Do you feel the assignments are too easy or too hard?

I think it is perfect. Some questions are easier but still provide a good understanding. Some are way harder and takes quite some time to solve. But overall, I have found that the assignments are very useful in helping me understand about the different topics. The way assignments are structured (having both math and coding problems) really helped me understand the topics better.
